

SUMMARY

Key Words: preschool education, early childhood education, educational programs, continuity

Subject matter: Preschool Education in Canada

Author: Yandieva A.B.

Supervisor: Professor of the Chair of Intercultural Communication, Linguodidactics, Pedagogical Technology Training and Education, Doctor of Pedagogical Sciences Lezina V.V.

The supervising organization: Pyatigorsk State Linguistic University

The aim of the research: to identify the effective mechanisms for pre-school education in Canada for their continuity in Russian preschool educational institutions

The methods used:

- Theoretical: analysis of psychological, pedagogical literature on the topic of the research, study and generalization of the Canadian experience in the field of pre-school pedagogy, classification, systematization of information;
- Empirical: the study of foreign sources;
- Design: modeling, algorithmization;
- Statistics: quantitative and qualitative analysis of the survey data, the formulation of the results in tabular form

The results obtained and their novelty: is that the study touches upon the current issues in the field of pre-school pedagogy, its scientific novelty has theoretical and methodological significance. The study of the positive experience of the Canadian pre-school education is carried out with a view to the continuity of its achievements and the implementation of these achievements in the Russian system of preschool education.

The theoretical value of the research is that it investigates the structure, especially of the pre-school education in Canada taking into account the achievements in the sphere of education and training of preschool children. Moreover, new materials, facts and statistics are put into practice in psychology.

The practical value of the research and spheres of application are determined by the ability to use its results in the development of programs of education and training at preschool educational institutions. The approbation of the recommendations developed by the author for domestic preschools reflected their effectiveness. Materials of the research can be applied in the training courses of

teachers of preschool institutions and in the development of special seminars for students studying at 050400- "Psycho-pedagogical education" profile, especially at "Psychology and Pedagogy of Preschool education" profile.
