The Supervisor of the Graduation Thesis: Gorbunov A. P., the Doctor of Economics, Professor of the Department of Creative and Innovative Management and Law.

Information about the customer organization: the administration of Pyatigorsk.

Actuality of research theme. The problem of social partnership is currently very diverse. Social partnership is increasingly acting as a tool for regulating various social relations, going beyond the social and labor sphere. Intersectoral interaction implies equal dialogue and productive joint activities of government bodies, business and public organizations aimed at solving society's problems.

The development of intersectoral social partnership is one of the ways to improve the organization of municipal governance. At the present stage, local self-government in Russia is faced with a whole range of problems that cannot be solved without the help of partners. Social partnership is becoming a prerequisite for the effective solution of socio-economic problems by consolidating the local community, activating public organizations and business and increasing the efficiency of using all resources of the territory.

The aim of the study is to study the practice of implementing intersectoral social partnership at the municipal level and develop relevant recommendations for its improvement.

Objective of the Research:

to consider the concept, essence of intersectoral social partnership and forms of implementation;

to study the basic principles of intersectoral social partnership;
to reveal the features of the technology of social partnership;
to analyze the current state of the social sphere in Pyatigorsk;
to study the practice of implementing intersectoral social partnership at the municipal level;
to identify ways to improve the efficiency of implementing intersectoral social partnership at the municipal level.

Theoretical and practical the significance of the work. The theoretical provisions set forth in the final qualifying work help to identify the features of the organization of social partnership at the municipal level as a system of intersectoral interaction. In addition, the result of the work is formulated practical recommendations for local governments to improve the management system for intersectoral interaction, as well as recommendations for organizations participating in the partnership to design their activities.

The Findings of the Research. Currently, in the resort town of Pyatigorsk, intersectoral social partnership is being implemented within the framework of various social projects. The joint activity of the subjects of social partnership in the territory of Pyatigorsk solves the following tasks: maintaining the standard of living of low-income families, strengthening the targeted social support of citizens in need; reducing the level of social inequality; increasing the income of the population.

Recommendations. In the process of developing the system of intersectoral social partnership in the city of Pyatigorsk, it becomes obvious that full information support is necessary for its normal functioning. In order to effectively develop the interaction of social partners and solve socially significant problems of the city of Pyatigorsk, a Model for the formation of a system of information support for subjects of social partnership is proposed. The model, as an integral object, includes an integrated set of interconnected complex information support processes aimed at the effective functioning and development of interaction between social partners.
