

SUMMARY

The Subject Matter of the Graduation Thesis: The Analysis and Forecasting of Threats to the Economic Security of a Modern Enterprise (by the Example of the Joint-Stock Company «TransTeleCom Company»).

The Author of the Graduation Thesis: Perova Daria Andreevna.

The Supervisor of the Graduation Thesis: PhD in Economics, Professor of the Department of Economics, Management and Finance N.N. Kiseleva.

The Information about the Contracting Authority: JSC «TransTeleCom Company».

The Topicality of the Research: The modern economy is characterized by a high degree of uncertainty, increased competition and volatility of the key economic indicators. This leads to the expansion of the spectrum and increase of the intensity of manifestations of threats to economic security which most strongly affect the micro level – the level of activity of economic entities. Under these conditions, research in the field of methodology and specialized tools for analyzing and predicting threats to the economic security of economic entities is of particular theoretical and practical importance.

Objectives of the Research: are to substantiate theoretically the need for analysis and forecasting of the threats to economic security in the Russian companies' activities and work out some recommendations to improve them.

The Tasks of the Research:

- to describe the concept and nature of the enterprise's economic security;
- to study the types and sources of threats to the economic security of the enterprise;
- to examine the methods used to analyze and predict threats to the economic security of the enterprise;
- to analyze the performance of JSC «TransTeleCom Company»;

- to carry out a research in the sphere of analysis and forecasting of threats to economic security at JSC «TransTeleCom Company» and their peculiarities;

- to work out the recommendations to improve the analysis and forecasting of threats to economic security of JSC «TransTeleCom Company».

The Theoretical Significance of the Research lies in the fact that it is necessary to expand scientific ideas about the nature and content of the analysis and forecasting of threats to the economic security of economic entities. **The practical significance** lies in the fact that the findings and recommendations of the research can increase the level of economic security of both JSC «TransTeleCom Company» and other Russian enterprises.

The Findings of the Research: Systematic analysis and forecasting of threats to economic security will allow the company to spend its resources more efficiently and expediently and increase the efficiency of the economic security system since it is much more profitable to prevent possible threats to the economic security of the enterprise.

Recommendations:

- firstly, we propose developing a guide for the analysis and forecasting of threats to economic security of JSC «TransTeleCom Company»;

- secondly, we propose creating its own database of economic security threats in the company.
