

ABSTRACT OF THE FINAL QUALIFICATION WORK

Subject of the final qualification work: Ethno-concept "Beauty / krasota" in English and Russian linguistic cultures

Author of the final qualification work: Sarkisova Angelina Arturovna

Research supervisor of the final qualification work: Candidate of Philology, Associate Professor of the Department of TLPMO, IIYAMT Babitova Larisa Aslanbievna

Data on the customer organization: Pyatigorsk State University

Relevance of the subject of the research: the specificity of the discursive understanding of beauty has not yet been the subject of special research in linguistics. Comparison of the characteristics of this ethno-concept in Russian and English linguocultures will make it possible to more clearly represent the system of value priorities of different linguocultural groups.

Aim of the work: to draw up a comprehensive description of the ethno-concept "beauty / krasota" in Russian and English linguistic consciousness.

Tasks: - to define the concept of ethno-concept in pragmalinguistics;
- to consider the linguistic approach to the study of this ethno-concept;
- to consider the methods of ethnoconcept research;
- to make a semantic analysis of the derived words of the ethno-concept "beauty / krasota";
- to consider the synonymous series of the ethno-concept "beauty / krasota".

Theoretical importance of the research: contributes to the theory of pragmalinguistic research as applied to the study of vocabulary. This study shows the specific features of the vision of the world by native speakers of Russian and English.

Practical value of the research: The materials of this thesis can be used in lexicographic practice in compiling a dictionary of basic ethnoconcepts, in translation activities, in writing textbooks on lexicology, translation studies, comparative linguistics, cognitive and pragmatic cognitive linguistics, in compiling reviews of conceptological studies.

Results of the research: were tested at the annual regional scientific-practical conference of young scientists, graduate students and students of PSU "Young Science-2021".

Recommendations: The results obtained in our study can be used in the practice of English language teaching in high school; in advanced training courses for teachers of foreign languages.
