

## REPORT

**Topic of the final qualification work:** Interactive technologies for supporting voluntary initiatives in the youth environment.

**Author of work:** Kokova Milana Muaedovna.

**Scientific adviser:** associate Professor of the Department of creative innovation management and law; candidate of economic Sciences: May-Boroda Galina Nikolaevna.

**Information about the requester's organization:** Institute for the development of civil society, interethnic and interfaith peace, NKO "Edinstvo».

**The relevance of the research topic is** that there is a problem of developing the volunteer movement and supporting youth initiatives, using interactive technologies that improve volunteer activities. In this regard, our research is becoming popular to study.

**The object of research** is voluntary organizations and associations.

**The subject** являются of the research is interactive technologies used in the framework of the activities of youth voluntary organizations.

**The aim of the research** is to generalize the theoretical and practical foundations of implementing interactive technologies to support voluntary initiatives in the youth environment and develop recommendations for their improvement.

To achieve the research goal the following tasks were **set**:

1. To examine modern scientific approaches to use of interactive technologies in the field of volunteerism
2. give a description of interactive technologies in the framework of the activities of voluntary organizations and initiatives
3. To summarize the domestic and foreign historical experience in the use of interactive technologies in the sphere of volunteering
4. Analyze interactive technologies for supporting voluntary initiatives in the youth environment
5. Analyze ways to improve volunteer organizations through the use of

interactive technologies

6. Develop a plan to introduce improving interactive technologies in the process of volunteer organizations ' activities.

**The theoretical significance and novelty of the research is to clarify** the forms and scientific principles of using interactive technologies to support voluntary initiatives.

**Practical significance** consists in the development of a plan for the introduction of improving interactive technologies into the process of activities of the NGO "Unity" volunteer organization.

**Research result.** In the course of the study, we analyzed interactive technologies for supporting volunteer initiatives , identified the main principles on which the work of volunteers is based, identified the main goals of interactive methods for supporting volunteer initiatives, and developed improving recommendations.

**Recommendations.** Recommendations were developed in our study : in our opinion, the forms and methods of supporting volunteerism, as well as the use of interactive technologies in organizing the activities of voluntary organizations, will contribute to the development of volunteerism and youth associations.
