

**The theme of the final qualifying work:** "Development of suggestions on design and realization of tours for gourmets to North Caucasus federal district"

**The author of the FQW:** The third-year student of IISTFL, the direction of preparation 43.02.10 - "Tourism" Parchelli Anastasia Leonardovna

**The scientific adviser of the FQW:** Doctor of Philosophy, professor of department of tourism and hotel service Burnyasheva Lyudmila Aleksandrovna

**Actuality of the theme of research:** gastronomic tourism is the most tasty of all types of tourism on the planet, relatively the new type of tourism which actively develops on the North Caucasian Federal District. Each of seven subjects entering North Caucasus federal district accepts thousands of tourists in the territory, showing, how magnificent is taste of what locals ate since ancient times. The gastronomy is that area of culture which is not just popular today but acts as a source of receiving income. The gastronomy is considered as a powerful factor influencing tourist and financial streams, a factor of strengthening of stability and steady development of territories. This is all confirms relevance of realization of tours for gourmets on the North Caucasian Federal District.

**The purpose of the final qualifying work:** Development of suggestions on design and realization of tours for gourmets to North Caucasus federal district.

**Tasks of the research:**

1. To study features and to reveal specifics of the tour organizations for gourmets.
2. To consider routes of tours for gourmets of the different countries.
3. To give a general characteristic of the region of North Caucasus federal district, to reveal possibilities of the tour organizations for gourmets.
4. To choose a route and to make the program of a tour.
5. To make a package of documents for certification of a tourist route.
6. To make calculation of cost of a tourist travel.

**Theoretical and practical significance of the research:** the theoretical importance of a research consists in studying of features of the tour organizations for gourmets, in opportunities of each region of North Caucasus federal district to involve tourists for a gastronomic type of tourism. The practical importance of work consists in possibility to use the practical recommendations for increasing the importance of gastronomic tourism submitted in a research in the territory of North Caucasus federal district. The developed tour can be provided to tour operators for practical application.

**The results of research:** we developed the program of a tour on North Caucasus federal district for gourmets, the package of the methodical documents necessary for tour certification has been developed, its cost is also counted.
