

**The resume of the bachelor research work**  
**"Speech contact and description of speech markers"**  
**by the scientific degree seeker**  
**Ekaterina Chelasheeva**

In this bachelor research work we have analyzed the ways, which are used by people for getting into contact. We have also described speech markers of young people's language and given examples, which were taken from popular books for teenagers. We have chosen this theme, because research of language features of communication partner is very important for making contact and for maintaining this contact. We have paid attention to language of young people, because students often have no opportunity to speak with informants and so find out all details of their language, and when they come to Germany, they have not enough knowledge to understand young people and free speak with them.

The main theme of the work is communication, which is one of the most important parts of people's life. Communicating with other people, the person gets new information and broadens his horizons. For good communication all differences between the speakers (culture, age, religion differences and so on) must be taken into account.

The speech of the person can give a lot of information about him. The person's characteristics leaves mark on the way the person speak, his choice of words, his voice and so on. Analyzing this, the person can make image of the partner.

The communication is the part of people's life, which interacts with all others. It has no limits and changes every moment, so the researching of communication will always important and necessary.
