

Abstract

Graduation Level of Proficiency Paper
(Bachelor's degree, Specialist's degree, Master's degree)

Subject matter: Language nomination of baked goods in modern Spanish language and its didactic potential.

Author: Bella Guketlova

Supervisor of studies: Candidate of Pedagogic Sciences, Associate Professor Natalia Filatova

Information about customer organization: Federal State Budget Educational Institution of Higher Education "Pyatigorsk State University".

Topical Importance: consists in the need to study the linguistic specifics of language units "baked goods", whose referents play an impressive role in human life.

Goals: realization of a linguistic analysis of the specifics of linguistic units "baked goods" in modern Spanish language.

Tasks of the research:

- ✓ define the term "nomination" and consider its aspects;
- ✓ define the concept of "language nomination" and consider the current stages of its development;
- ✓ analyze the language nominations of baked goods and determine their classification;
- ✓ consider ways to nominate baked goods.

Theoretical value and practical applicability of the research:

The theoretical significance of the study lies in the fact that various factors of linguistic and cultural nature, that already have influenced and continue to influence the process of nomination of baked goods, have been identified. *Practical significance of the research* consists in the possibility of using the results obtained on the material of studying the language nominations of baked goods in

the process of communicative act, while studying the gastronomic special aspects of Spanish culture. In addition, the proposed material can serve as a didactic subject and can be used in general educational institutions, namely, during studying the gastronomy of Spain and its cultural characteristics.

Implementation advice:

In this graduate qualification work, we attempted to analyze baked goods in Spanish language, because until now, the systematic linguistic analysis has not been developed. The results obtained during the research can contribute to optimizing the process of studying the gastronomic characteristics of Spanish culture. In addition, the proposed material can serve as a didactic subject and also can be used in studying.
