

SUMMARY

Subject: Improving the technology of social work with adolescents with asocial behavior (on the example of the Kislovodsk CCSS)

Author: Arakelov Andranik Arsenovich
Scientific adviser: Dr. Philos. Sciences, Professor, Department of Creative and Innovative Management and Law Bogdanova E.N.

Organization - customer: State budgetary institution of social services "Kislovodsk integrated center of social services for the population."

The relevance of the topic is due to the fact that at present a number of unfavorable trends are intensifying in society, leading to the emergence of the category of "adolescents with antisocial behavior". Children are especially vulnerable and exposed to negative influences during the period of social maturation and entry into the adult world, since at this time they are characterized by mental instability, unformed character, neuropsychic overloads and stresses coupled with material insecurity.

The purpose of the work is to study the technologies of social work with adolescents with asocial behavior in a comprehensive center for social services and to suggest ways to improve them.

To achieve the goal it is supposed to solve the following tasks:

- to study the socio-psychological characteristics of adolescents with antisocial behavior;
- consider the social and legal conditions for the provision of services to adolescents with asocial behavior in the Russian Federation;
- analyze foreign theories of social assistance to adolescents with asocial behavior;
- give a general description of the technologies of social work with adolescents with antisocial behavior;
- to summarize the experience of the Kislovodsk CCSS in the aspect of helping adolescents with antisocial behavior;
- to develop recommendations for improving the technology of social work with adolescents with asocial behavior in the Kislovodsk CCSS.

The object of the study is a social group of adolescents with antisocial behavior, in need of social support.

The subject of the study is the technology of social work with adolescents with antisocial behavior in the Kislovodsk CCSS.

The theoretical and methodological basis of the study is the analysis of publications of domestic and foreign authors on the problem of asocial behavior of adolescents, materials of monographs and scientific conferences. In the research process, the following scientific methods were used: the method of comparative analysis, system analysis, generalization, classification, analysis of statistical data.

The empirical basis of the study was the results of opinion polls, data from the Federal State Statistics Service on the issues of asocial behavior of adolescents, and data from the Ministry of Labor and Social Protection of the Russian Federation.

The theoretical significance of this study is to clarify the concept of “adolescents with antisocial behavior”; generalization of the accumulated foreign and domestic experience in the aspect of helping adolescents with asocial behavior/

Practical significance is determined by the possibility of using the results of the study in developing programs for group and individual work with adolescents with asocial behavior in the context of the Comprehensive Center for Social Services of the Population.

The main results of the study are expressed in the fact that the technology of social work with adolescents with antisocial behavior was studied. Then, they analyzed the work of the Kislovodsk Central Social Education Center and proposed ways to improve the technology of social work with adolescents with asocial behavior.
