Subject matter

The Latin assimilations in French

Author: Orbelyan Anna

Supervisor of studies: Ryashchenko M.

Information about customer organization: Chair of French philology and the intercultural communications.

Topicality of the research:

It is connected with the Latin adoptions in French XIV- of the XV substances.

Objectives of the research:

It is connected with the Latin adoptions in French XIV- of the XV substances

Tasks of the research:

- the analysis of the state of latinization of the XIV- XV substances in the modern French language, their assimilation at the level of orthography and pronunciation
- different cases of the latinization of the French orthography of the XIV- XV substances;

Theoretical and practical significance:

The theoretical significance consists in the fact that data it can be used in the study of the normalization of French XIV-XVI of substances on the level of phonetics and orthography, and also word formation.

The practical value of work consists of the application of results in the practical courses of orthography, phonetics of French and at the seminars as on the history of language, so lexicology.

Results of the research:

The carried out analysis of the state of French orthography XIV - THE XV substances - "etymological" - made it possible to reveal reasons and ways of the etymologization of orthography, and to also determine that part of the etymolozation which is conventionally designated as "the blockage" of orthography.

Recommendations: the results of the research can be recommended to translators and interpreters, to professors of French linguistics working at different types of educational and linguistic programmes.
