

SUMMARY FINAL QUALIFYING WORK

Subject matter of the final qualifying work: Organization of socio-cultural prevention of extremism in the modern youth environment.

Author of FQW: Bogieva Diana Robertovna

Scientific adviser of FQW: associate Professor of creative-innovative management and law May-Boroda G. N.

Relevance of the research problem is the need for a comprehensive scientific understanding of its essence, specific and practical ways to organize socio-cultural prevention of extremism in the modern youth environment.

Objective of the study: generalization of theoretical and practical bases of organization of socio-cultural prevention of extremism in the modern youth environment and development of recommendations for its improvement.

Tasks:

- to study the concept, signs, main forms, structures and social risks of extremism in the youth environment;
- substantiate the methodology of the socio-cultural concept of preventing extremist behavior in the youth environment;
- identify the specifics of prevention of youth extremism by socio-cultural organizations;
- to characterize the socio-cultural activities as the basis for the prevention of youth extremism in the FEDERAL state of ICC «Artek»;
- analyze the organization of socio-cultural prevention of youth extremism in the international children's center «Artek»;
- develop recommendations for improving the organization of socio-cultural prevention of youth extremism in the ICC «Artek».

The theoretical significance it is determined by the use of the theoretical apparatus of the theory of socio-cultural activities in the sphere of organizing socio-cultural prevention of youth extremism in solving a scientific problem.

Practical significance of the final qualification work: the studied theories were applied in practice, which as a result made it possible to solve all the goals and tasks set, as well as to develop a plan for the organization of prevention of youth extremism.

Results of a research: The theoretical analysis has shown that the main goal of socio-cultural preventive work to counter extremism in the modern youth environment is to prevent social maladaptation and correct social deviations that are the result of unfavorable social development caused by various environmental factors, upbringing and psychophysiological features. The process of prevention of further deviant behavior of adolescents should be carried out purposefully in the joint activities of various levels of bodies with institutions of socio-cultural activities, in order to increase the effectiveness of the activities.

Organizational forms of work with young people should be aimed at developing their cognitive interests and abilities. It is important to note that this age period of development is characterized by significant changes and the final formation of all aspects of the personality-psychology, physiology and relationships. Therefore, only a differentiated approach to the choice of certain forms can ensure the effectiveness of their impact.

Recommendations:

Based on the research, the Federal state budget educational institution Artek international children's center was offered methodological recommendations for improving the organization of socio-cultural prevention of extremism.

Based on the proposed recommendations, the activity of the Artek shopping center in this area will become more systematic, and will also meet the needs of vacationers in this direction. The proposed recommendations can be replicated in the activities of other recreational socio-cultural institutions, which will allow to develop the sphere of socio-cultural prevention.
