

Abstract
Graduation Level of Proficiency Paper
(Master's degree)

1. 2017

2. Title : The use of Gaming Technology in the process of teaching Russian as a foreign language.

3. Author: Mishayeva Aminat Musayevna

4. Research Supervisor : Fedotova Irina Borisovna, Doctor of Pedagogic Sciences

5. Specialization: 44.04.01 Pedagogical education (Lingvopedagogical training in methods of teaching Russian as a foreign language)

6. Master's degree

7. Higher School of Language Arts, European and Oriental Languages

8. Chair of Language Arts and Pedagogic Technologies of Philological Education

Topicality Importance: One of the major objectives of research in modern training methods of teaching Russian as a foreign language is to optimize the learning process which involves scientifically substantiated choice of methods, technologies and techniques. Gaming Technologies (GT) can strengthen the efficiency perception of [the educational learning material](#), expand vocabulary, elaborate the ability to think logically, develop memory improvement habits, enhance students intellectual activity, raise non-standard ways of thinking and ingenuity of ideas.

Goal: is to study didactic possibilities of GT as a way to revitalize students' activity and develop methodical recommendations using GT in the process of teaching Russian to foreign students. **Tasks:** 1) is to reveal substantial content of the methodological concept of 'Game'; 2) to expose the pedagogical [essence](#) of game, its educational and developing functions; 3) to study sociopsycholinguistic preconditions of using Games in teaching Russian as a Foreign Language; 4) to analyze the experience of realization of didactic games in the systematic technique of teaching Russian as a Foreign Language.

The theoretical value is defined by a theoretical study of the relevance usage of GT in the process of teaching Russian as a Foreign Language, the possibility of the effective prerequisite formation for the further study and analysis of the increasing use of GT.

Practical significance: The didactic and educational potential of GT, defined in the study, makes it possible to use Games actively in academic and training activities of foreign students.

Results: A number of significant scientific works of outstanding domestic and foreign psychologists, teachers, methodologists and linguists have been studied; also the [key aspects](#), the possibilities of optimizing the traditional process by using GT have been defined and analyzed.
