

## ABSTRACT

of the final qualification work on the topic:

**"Communication Barriers in the Epoch of Linguistic**

**Globalization based on the Material of Modern English and Italian Languages".**

**Author of the work:** Yu.D. Kuleshova

**Research Supervisor:** Professor, grand PhD in Pedagogic sciences, Head of the Department of Theoretical Linguistics and Practice of Intercultural Communication of the Institute of foreign languages and international tourism PSU A. M. Akopyants.

**Research Initiator:** Pyatigorsk State University

**The relevance of the research topic** is due to: 1) poorly developed issues of communication barriers in the epoch of linguistic globalization; 2) the dynamism of integration processes, which sharply raise the issue of increasing foreign language competence, the core of which is fluency in a foreign language in the absence of linguistic and intercultural barriers.

**The purpose** of the research is to study various types of communication barriers in the era of linguistic globalization and develop strategies to overcome them.

**Research objectives:**

- 1) to explore the concept of a language barrier and its varieties;
- 2) to study causes of occurrence of a language barrier in intercultural communication;
- 3) to explore communication barriers as a psychological and pedagogical problem in higher educational institutions in the context of globalization;
- 4) to conduct an experimental work to identify different types of barriers among of higher education students;
- 5) to analyze the results of the experiment in order to identify language barriers;
- 6) to develop strategies for overcoming communication barriers.

**Theoretical and practical** work consists in the fact that its results contribute to the study of language barriers, its structure and content. The types of communication barriers which are identified and described in the work make it possible to supplement the existing classifications in science and to expand the basis for understanding of the causes of difficulties arising in the process of foreign language communication. The development of an experimental basis for identifying and elimination different types of communication barriers creates the basis for further research on the indicated problems.

**Research results:**

- conducting of an experiment to identify different types of language barriers;
- development of a strategy for overcoming language barriers among students of higher educational institutions;
- "A set of educational and diagnostic tasks to identify and eliminate communication barriers of students of higher education."
- publication of a scientific article on the topic "The influence of stereotypes on the process of cross-cultural communication" / Molodaya nauka - 2020: Materials of the regional interuniversity scientific and practical conference of students, graduate students and young scientists. - Pyatigorsk: PSU, 2020.- p.111.

**Recommendations for the implementation of practical research results:**

The research results can be included into lecture courses of linguistic disciplines, as well as in teaching intercultural communication.
