

ABSTRACT

Title: Anthroponyms in the angle of communication (on the basis of Spanish appeals)

Author: Vasyakina E. G.

Research Supervisor: Sementsova Natalya Viktorovna

Research Initiator: PGLU, the department of Spanish language

Topical Importance: The researches of communicative process are among the most pressing problems nowadays. Anthroponyms by-turn are a necessary part of the communicative space. During the last years in modern linguistics the anthropocentric approach to the study of any phenomenon is in the first place. A man, his personal characteristics and features are in the centre of research. In connection with these factors, any anthroponymic research is topical. The study of personal names as main identifiers of the individual in society presents the particular interest. Anthroponyms are one of the most important parts of national culture which is closely connected with national values and traditions.

Goals: To study anthroponyms in the angle of communication on the basis of Spanish appeals.

Tasks:

- to study aspects of research and the theory of studying of anthroponyms;
- to consider the specifics of the anthroponyms using as appeals in Spanish;
- to analyze the linguistic, psycholinguistic, sociolinguistic and cultural communication characteristics, factors that influence the verbal behavior and the use of anthroponyms in the angle of communication;
- to show the peculiarities of the anthroponyms functioning in Spanish verbal communication.

Theoretical value and practical applicability: The *theoretical value* of this work consists in the following: results contribute to the systematization and the correlation of the various theoretical approaches to the study of the anthroponyms in the angle of communication on the basis of Spanish appeals. The obtained data clarify and enhance the representation of the Spanish anthroponymics as linguistic science, as well as of the use of Spanish anthroponyms as appeals in communication. The *practical value* of this paper is defined by the possibility to use the results or research in studying Romance anthroponymics, linguoculture, speech etiquette and the Spanish lexicology.

Results: In this paper we have defined aspects of research of the anthroponyms in the angle of communication on the basis of Spanish appeals, their features, classification of the contextual criteria, role, functions and importance of anthroponyms in communicative process and intercultural relationships. There is great number of examples.

Implementation advice: The results can be used as a guide in Spanish and used to prepare for such disciplines as "Romance anthroponymics", "Spanish lexicology".
