Author of the master's dissertation: Yuryeva Oksana Andreevna

Scientific supervisor of the master's dissertation: dr. phil., senior lecturer, assistant professor of departments of creative and innovative management Bogdanova Elina Nikolaevna

Customer organization: Volunteer center "PROFI-SOTSI-LINGVA"

Topicality of the research: the problem of welfare adaptation of orphan children from orphanages to Caucasus Mineralnye Vody region can be solved with the help of continuous inclusion of volunteer activity of youth in work with this social group. Researches have shown that mentoring gives the chance to teenagers, pupils of orphanages of Caucasus Mineralnye Vody region, to find in the person of volunteers of significant mentors, to improve with them the long relations which will help teenagers to receive social skills, to raise a self-assessment and more successfully to be socialized.

Objective: to prove theoretically and to check experimentally innovative technologies of volunteer activity of student's youth for welfare adaptation of orphan children from orphanages.

Tasks:

1. To consider volunteer activity as the welfare phenomenon.
2. To study modern technologies of welfare adaptation of orphan children from orphanages.
3. To develop innovative technologies of welfare adaptation of orphan children from orphanages to Caucasus Mineralnye Vody region: the technologies based on theater; the technologies based on arts and crafts; the technologies based on a form of cultural and educational tourism.

Hypothesis is based on the concept of sociocultural and personal conditionality of processes and problems of welfare adaptation of orphan children.

Novelty of the research consists in development of conceptual bases of sociocultural adaptation of orphan children means of welfare activity by means of volunteer activity of youth on the basis of an innovative technique, the including keeping, the principles and technologies of the SCA organization, criteria and indicators of adaptation readiness of pupils.

The main principles to be depended:

1. Volunteer activity is one of the positive factors in the formation and development of a young person in the process of preparing for an independent life and professional orientation.
2. In Russia, the state still pays little attention to the problem of cultural development and moral and moral education of youth.
3. Sociocultural adaptation of children is ensured by the simultaneous occurrence of several processes that contribute to the harmonization of children at three levels: the individual, culture and society.

4. Of particular importance in the work are technologies of socio-cultural activities aimed at regulating the processes of socialization, culturalization and individualization of the personality of pupils of orphanages.

Theoretical and practical significance of the research is connected with its direct access to the solution of the problem of orphanhood, in particular, socio-cultural, that is complex and urgent for the present stage of social development.

Results of the research can help in solving the problems of socialization of the younger generation; search for ways to strengthen social solidarity, social order and improve the country's human potential.

Recommendations: the results of the conducted research give an opportunity to improve activities and develop new approaches to the organization of educational and psychocorrectional work, help to clarify the essence of the existing forms of socio-cultural work.
