

## **Abstract**

Graduation Level of Proficiency Paper  
(Bachelor`s degree / Specialist`s degree / Master`s degree)

**Title:** Stylistic features of the text of popular scientific substyle of Spanish

**Author:** Karayanova Anastasia

**Research Supervisor:** CPC, Associate Professor E.A. Vishnyakova

**Research Initiator:** Piatigorsk State Linguistic University

**Topical Importance:** In recent years there is an exchange of the scientific information which effectiveness wholly depends on level of proficiency in the scientific register of speech more intensively, from ability according to a concrete situation of scientific communication it is correct to choose a statement manner, varying quantity of neutral, book and expressional and figurative language tools. Moreover, understanding and judgment of the language processes happening at the present stage in scientific speech, allows to characterize more precisely some phenomena which are observing in common-literary language.

**Goals:** the complex description of the reference stylistic features of the scientific text of Spanish on the basis of research of concrete examples of lexicon, morphology and syntax of the presented material.

**Tasks:** - to locate scientific style in system of the functional styles of language;

- to give definition of the scientific text;

- to define syntactic, morphological and lexical features of the scientific text on concrete examples;

- to reveal the most common, reference means of expression of scientific thought at different levels of language system and feature of their functioning;

- to define degree of common use of the language elements inherent in scientific style, depending on the presented genre of scientific literature.

**Theoretical value and practical applicability:** Theoretical value of research consists not only in expansion of knowledge of regularities of functioning of language in one of leading spheres of communication - the science sphere, but also definition of the status of the scientific text in system of works of written scientific language.

Practical value of work is that research of stylistic norms and features of scientific literature is useful to studying of important problems of the standard of speech, history of the literary language, and also for a technique of teaching of language and some applied linguistic disciplines. After all scientific literature plays motivating role for pupils.

**Implementation advice:** results of research can be used in the course "Stylistics", in linguistic courses, in special courses according to the language theory.
