

SUMMARY

Subject matter of the dissertation: FINANCIAL SECURITY IN THE SYSTEM OF ECONOMIC SECURITY OF A MODERN ENTERPRISE (on the example of "INGUSHNEFT" of the subsidiary "ROSNEFT").

Author of the dissertation: 5th year student, ES 511-15, Tsechoev Ilez Akhmedovic

Scientific supervisor of the dissertation: D.E.S., Professor Maslova Dagmara Vasilievna

Customer organization: "INGUSHNEFT"

Topicality of the research: Up to this time, the problems of economic security are studied mainly in relation to the country as a whole or to the constituent entities of the Russian Federation, and the issues of economic security of an enterprise remain on the periphery of most studies. The allocation of the category of economic security of the enterprise, interpreted as the ability to withstand the risks and challenges of the external and internal environment, is inextricably linked with the problems of finance of economic entities. This is especially important in relation to such large companies as ROSNEFT and its subsidiary INGUSHNEFT. These enterprises are the largest taxpayers, creators of jobs and incomes, and the economic security of the country (ROSNEFT) and the region (INGUSHNEFT) largely depend on their financial stability.

Objective: to reveal the theoretical and practical foundations of ensuring financial security in the economic security system of a modern enterprise.

Tasks: - to assess the financial and economic situation of "INGUSHNEFT" in the aspect of ensuring economic security; to analyze the financial statements of ROSNEFT as the parent company and the financial statements of INGUSHNEFT as a subsidiary; to identify the problems of ensuring financial security and financial stability of "INGUSHNEFT"; to substantiate the measures meant to increase financial security and financial stability of "INGUSHNEFT".

Theoretical and practical significance of the research: the research is determined by concretization of issues related to the financial security of the enterprise, an analysis of modern threats to the security of the enterprise and its financial stability, which an economic entity may encounter in the course of its activities. The practical significance of this work lies in the fact that the proposed recommendations can be used by the management of RN Ingushneft to improve the financial security system at the enterprise and its financial stability.

Results of the research: the components of economic security of the enterprise were studied, as well as the financial statements of ROSNEFT and INGUSHNEFT. Based on the information received, the negative aspects that have an impact on the financial security of INGUSHNEFT are identified, methods for improving the financial security and financial stability of the enterprise are proposed.

Recommendations: to introduce the proposed measures to the enterprise. Get a fairer price from ROSNEFT. To change the sales structure and the structure of finished products (partially switch to a high degree of processing), i.e. build a factory.
