Scientific supervisor of the FQW: O. S. Eremina, candidate of historical Sciences, associate Professor of the Department of creative and innovative management and law.

Information about the customer organization: administration of the Mineralovodskiy city district.

Relevance of the research topic. Social policy is a purposeful activity of the state to develop and implement decisions that directly affect a person, his position in society; to provide social guarantees to a person, taking into account the characteristics of various groups of the country's population. The municipal level is designed to specify methods, ways and mechanisms for achieving the goals, defined in the framework of federal and regional social policy, in relation to the specific territory features. The task of local self-government bodies, as the closest to the population, is to directly provide a set of social services that ensure human living conditions and reproduction.

The purpose of the research is to develop and scientifically substantiate recommendations for improving the practice of implementing state social policy at the municipal level.

Research objectives:

- to reveal the concept of social policy and its main content;
- consider social statehood as one of the foundations of the constitutional system of Russia;

- to study the organizational and managerial basis for the formation and implementation of social policy in Russia;
- analyze the priority directions of social policy of the Mineralovodskiy city district;
- research the practice of implementing social policy at the local level;
- identify ways to improve the practice of implementing social policy at the local level.

Theoretical and practical significance of the work. The theoretical provisions set out in the final qualification work, contribute to the clarification and expansion of scientific information about the content of modern social policy. In addition, the conclusions and practical recommendations, developed in the course of the study, can be used both in the work of local self-government bodies of the Mineralovodskiy city district and in the activities of local authorities of other municipalities, in order to improve the implementation of state social policy.

Results. The most important strategic direction in the field of social policy of Mineralovodskiy city district is to improve the level and quality of life of citizens in need of social support. The goals of the social policy of Mineralnye Vody are : implementation of certain state powers in the field of social support for certain categories of citizens of the Russian Federation, living on the territory of Mineralovodskiy city district; provision of additional measures of social support to certain categories of citizens, permanently residing on the territory of the city district; providing financial support to public organizations of veterans, disabled people and other socially oriented non-profit organizations, operating in the territory of Mineralovodskiy city district; creating conditions for the formation of an accessible living environment for the disabled and other low-mobility groups of the population of Mineralovodskiy city district.

Recommendations. Despite the overall positive dynamics in the development of the sphere of social protection and support of the city's population, the work with the disabled requires further improvement. Socio-cultural rehabilitation has a huge potential for a positive impact on the life of disabled

people. The implementation of the proposed program of socio-cultural rehabilitation of disabled people should provide a comprehensive solution to the problem of rehabilitation of socially vulnerable categories of citizens of the city Mineralnye Vody.
