

Summary

Subject matter: “The improvement in the system of the provision of an organization’s economic security on the basis of risk-management (on the example of “Kuban Agro-product”, ltd.).

Author: Yu.Yu. Shipulin.

Supervisor of studies: I.V. Shevchenko.

Customer organization: Krasnodar territory, Gelendzhik, 117, Kirov st., “Kuban Agro-product”, ltd.

Topicality of the research: In market-centric economic conditions heads of modern Russian companies are facing a multitude of tasks, one of which is the creation of the efficient system of the provision of a company’s economic security, ensuring the protection of its activity from entrepreneurial risks. So the search for and the adoption of the forms and methods of management that would enable the company to manage entrepreneurial risks posing threat to their operation while providing the appropriate level of economic security, became quite topical.

Objective of the research is to work out some recommendations for the improvement in the system of the provision of a company’s economic security on the basis of risk management.

In conformity with the objective the following **tasks** were set:

- to give the definition of a company’s economic security on the basis of risk theory;
- to consider the notion, classification of types and principles of management of entrepreneurial risks influencing a company’s economic security;
- to reveal the basic principles of the organization of the system of the provision of a company’s economic security;
- to describe the main stages of building up an adaptive system of the provision of a company’s economic security on the basis of risk management;
- to develop the techniques of risk management to provide the economic security of “Kuban Agro-product”, ltd.;

- to carry out the approbation of the mechanism of operation of the adaptive system of the provision of the economic security of “Kuban Agro-product”, ltd.

Theoretical and practical significance of the research is that it developed a non-traditional conceptual basis of the solution of the task of building up an effective model of the system of the provision of the company’s economic security on the basis of risk-management theory.

Practical significance of the graduation qualification paper consists in the prospective use of the suggested recommendations for the improvement in the efficiency of the operation of the system of economic security due to the application of the basic principles of risk management.

Results of the research lie in the theoretical and practical development of the techniques of building up an adaptive system of the provision of a company’s security system that would envisage building up of a multidimensional and multifactor system, having the properties of self-regulation, dynamics due to the application of the algorithm of the filtration and neutralization of risks, search for optimal solutions to risk management.

Recommendations: Practical recommendations related to the realization of the mechanism of the operation of the adaptive system of the provision of the company’s economic security are approbated in the work of “Kuban Agro-product”, ltd., which is confirmed by documents.

The application of the developed methodology will enable “Kuban Agro-product”, ltd. to ensure its successful operation in the long term on the basis of the improvement in the system of economic security.
