

Abstract

Graduation Level of Proficiency Paper (Bachelor's degree)

Title: Phraseological units with the components "sun", "moon", "star" in Russian and Spanish languages

Author: D. I. Podzyuban

Research Supervisor: A.S. Potapenko

Research Initiator: N. I. Filatova

Topical importance: In recent years in the linguistic literature the huge attention is paid to a problem of national and cultural language communication, in particular uses of phraseological units in speech. Spanish, as well as Russian, thanks to the extensive territorial prevalence, features of national cultures of his representatives, a variety of ethnic structure give great opportunities for studying of phraseological units. For this reason the phraseology so various in the form and semantics is actual for studying.

Goals: the structure description, classification and systematization of phraseological units with the components "sun", "moon", "star" in Russian and Spanish languages.

Tasks: to give definitions to the main concepts used in work: "phraseology", "phraseological unit", "astrony"; to describe features of the semantics of phraseological units and their component structure on the basis of which their value is formed; to make selection and to analyze structural features of the Spanish and Russian phraseological units with the components "sun", "moon", "stars".

Theoretical value and practical applicability: the research is of great value for further scientific investigations in the fields of the linguistics. It can be useful creating lectures on the linguistics, culture linguistics, the theory and the practice of the translation, learning and teaching the Spanish.

Results: the research gives a clear systematization of phraseological units with the allocated components.

Implementation advice: this research gives an example of the further perspectives of the comparing phraseological units in different languages.
