

Abstract

Graduation Level of Proficiency Paper (Bachelor's degree)

Subject matter: Modern technologies for organizing children's leisure in the summer camp (based on the summer language camp "Linguist")

Author: Alexandra Vladimirovna Ryashchenko

Research Supervisor: Candidate of Pedagogic Sciences, Associate Professor, Chair of Creative and Innovative Management and Rights, Yu.P. Dmitrieva.

The supervising organization: Federal State Budget Educational Institution of Higher Professional Education "Pyatigorsk State University", Institute of Roman and German Languages, Informational and Humanitarian Technologies, summer language camp "Linguist".

Topicality of the research: the organization of the children's leisure during summer periods has always been in the focus of attention of parents, teachers, and camp counsellors of both general and additional educational institutions, where children's daytime camps can be organized.

In this regard, a daytime camp for children can be considered the solution to the problem of children's leisure organization as it gives them a wide range of opportunities to show their potential, to acquire new knowledge and skills in the field of learning foreign languages, creative activities, cultural and entertaining events.

Objective: to study modern technologies for organizing leisure activities for children in a summer camp, based on the summer language camp "Linguist".

Tasks:

1. To examine the concept "leisure";
2. To characterize the camp as a form of children's leisure organization;
3. To study the technologies of organizing children's leisure in the summer camp;
4. To give an overview of the activities at the summer language camp "Linguist" (Institute of Roman and German Languages, Informational and Humanitarian Technologies at "Pyatigorsk State University");
5. To analyze the technologies that are applied in the activities of the summer language camp "Linguist";
6. To create an electronic resource for the camp counsellors of the summer language camp "Linguist".

Theoretical and practical significance of the research:

the theoretical significance lies in the analysis of the concept "leisure", the study of the methods, forms, and technologies for organizing children's leisure in a summer camp.

The practical significance lies in the development of an electronic resource for the optimization and modernization of camp counsellors' work at the summer language camp.

Research results: creation of an electronic resource – an online board «Летний языковой лагерь “Лингвист” #методматериал_Сделано с улыбкой для вожатых и детей» (“Summer Language Camp “Linguist” #method material_Made with a smile for camp counsellors and children”) based on Padlet applications.

Recommendations: This application can be used as a “planner”, which facilitates the organization of work, as all the materials needed for teaching a foreign language, creative classes, and events are collected there.

In addition, the content of the online board can be used as the visual material on the screens or interactive whiteboards during the lessons or events as bright colorful illustrations.
