

Abstract

The theme of the final qualifying work: The development of the site of the administration of Schastlivenskoe rural settlement KCHR

Author of final qualifying work: Baychorova Farida A.

Scientific adviser of the FQW: Cand. ped. Sci., Associate Professor, Chair of Information and Communication Technologies, Mathematics and Information Security, E.A. Pisarenko

Information about the contracting authority: The Federal State Budget Educational Institution of Higher Education "Pyatigorsk State University"

The relevance of the topic of this study: Relevance of the research topic. Speed of information delivery to a wide range of people and in the ability to organize feedback from customers

The purpose of the work: development of an information system that would have a good information base about the administration.

Tasks:

1. Formulate the scientific and methodological basis of the research.
2. Choose a site creation system.
3. Analyze the existing websites of local government.
4. Develop the design solutions and choose the most suitable ones.

Theoretical and practical significance of the research: The theoretical significance of the project is that the developed structure, functional filling of the site of the village settlement administration, information sources, mechanisms and development tools will allow using these materials to develop any site for administrations.

The practical importance of the work is to develop and create a website for the administration of Schastlivenskoe rural settlement KCHR

Results of the study: site of the administration of Schastlivenskoe rural settlement KCHR was developed.

Recommendations:

1. To place on the sites a navigator - a site map with the indication of all sections and pages of the site.
2. To enter in the database information about all services of the administration.
