The Topicality of the Research: The study of the tourism industry in the economic security aspect is an important issue of its development since tourism has both a profound positive and negative impact on people, economy and environment. But in the context of the unavailability of the national tourism industry not only to plan risk situations, but also to respond promptly to their occurrence, the more urgent are the issues related to the formation of the enterprise economic security system in the tourism industry.

Objectives of the Research: are to carry out a comprehensive analysis of the formation of the enterprise economic security system in the tourism industry and work out recommendations to improve it.

The Tasks of the Research:

- to describe the content and nature of the economic security of a tourist enterprise;
- to study the organization of ensuring the economic security system of a tourist enterprise;
- to describe the mechanism for ensuring the economic security of tourism enterprises;
- to examine methodological approaches to assessing the effectiveness of the economic security system of a tourist enterprise;

- to carry out an analysis of ensuring the economic security at JSC «Elbrusturist»;

- to work out recommendations for the formation of the system ensuring the economic security at JSC «Elbrusturist».

The Theoretical Significance of the Research lies in the possibility to use further the results obtained in the research in order to improve theoretical and methodological approaches to the formation of the economic security system of tourist enterprises. **The practical significance** lies in the fact that the findings and recommendations of the research can develop an efficient economic security system at JSC «Elbrusturist».

The Findings of the Research: The economic security of a tourist enterprise, its independence and the avoidance of being in a critical risk zone can be ensured only if the most important strategic areas for ensuring business security are provided, there is a clear algorithm of actions for the timely detection and elimination of possible threats, there is some reduction of the consequences of financial risks as a result of the effective use of the internal control system.

Recommendations:

In order to form an efficient economic security system at JSC «Elbrusturist», we have developed and propose to implement the following measures:

- firstly, we propose to develop an integrated and effective system for ensuring the economic security at the enterprise JSC «Elbrusturist»;

- secondly, we propose to create an economic security service at the enterprise.
